Lift

Features

*Improve visibility of
your Products &
Services, Promote your
property and
associated events.*

*Capture your guest's
attention...*

- Browser based Content Management Server allows you to centrally manage & control all display units.
- Schedule & target content to specific zones like bars, banquets etc.
- DigiSign client supports both standard and high definition displays.
- Integrate Marketing Information onto existing TV channels.
- 15 Built-in templates and custom Template Builder.
- Comprehensive calendar-view that gives a quick snapshot of scheduled files.
- Upload PPTs and run as a playlist in the Signage display.
- Run news alerts, general information as tickers.
- Use external USB to store and play contents.

Sample Layout

1 Video / Channel Broadcast / Image

4 Ticker

2 & 3 Image / Flash content

Benefits

- High Definition content display enhances the visual experience of the ads run and increases the viewership
- Broadcast Integration supports both Analogue (Cable) and Digital Broadcast (STB) Outputs
- Lower Cost of Ownership as the complete solution runs on specially designed hardware
- Playing content from external USB provides continuity even during network downtimes

About Glix
